

# CPI:

## Confidential Paranormal Investigators

---

**Investigation Date:**

March 27, 2010

**Location:**

Fort Massac. Metropolis, IL

**Investigators:**

Jen, Joe, Kathy and Walt

**Equipment:**

Canon EOS Digital Rebel XT  
Canon Xsi Digital Camera  
Olympus digital voice recorder  
Sony Digital Recorder

**Arrival at Fort:**

CPI members arrived about 9:00pm. A walk thru was conducted to get familiar with the location, including the various buildings and yard around the fort.

**Investigation Details:**

About 10:15pm the 4 members split up into two teams. Pictures were taken and digital recorders were used to pick up any possible evp's. Quiet observation was also done in some of the buildings.

Unfortunately due to the cold that night and lack of a controlled environment we cannot conclude that any evp's were captured. Investigators did not experience any personal activity inside the Fort.

Approximately at 11:30pm Joe was taking pictures in front of the Fort by himself. He felt someone walk in front of him and observed a shadow pass in front of him. Please see Joe's pictures that were taken at this time. Within 5 minutes of this happening Joe called to us to join him and see his pictures.

Due to the unexpected cold weather the investigation ended approximately at 12:30am.

### **Conclusion:**

After seeing the pictures that Joe was able to capture, it is strongly encouraged to investigate the Fort. More equipment should be used, specifically video cameras focused on the windows of some of the buildings. More attention should be given to the outside of the Fort including the land and walk-ways. There is definitely a presence of paranormal activity at this time there is not enough data to conclude if it is residual and/or intelligent. Hopefully with the investigation on June 5<sup>th</sup> there will be more data captured.

CPI would like to thank Terry and Fort Massac for the opportunity to investigate in the past and in the future. We will work diligently and use any scientific means to capture any paranormal activity there may be at and around the Fort.

Respectfully Submitted,  
Team Members of CPI
